

# Participant procedure: drug screening

*Procedures provide practical step by step guidance to describe processes and actions required to enable the implementation of a policy or guideline. They can also be developed to ensure compliance with legislative or policy requirements by members, staff or delegates of the Council*

Date of Endorsement	Endorsed By	Publication Date	Review Date
1 June 2018	Health Professional Councils of NSW	1 June 2018	1 June 2023

## Summary

This procedure explains to NSW health professionals and students<sup>1</sup> who have drug screening conditions imposed on their registration how to participate in drug screening.

## Applies to (Scope)

- NSW health professionals and students<sup>1</sup> required to undergo drug screening
- Health Professional Councils of NSW, their delegates and HPCA staff. There are separate policy and procedure documents for the Medical Council and the Nursing and Midwifery Council.

Document Owner	Functional Group/Subgroup
Assistant Director – Council Services	Council Services, HPCA

# Participant procedure: drug screening

## 1. Purpose

If you have drug screening conditions on your registration, this procedure explains how to:

- prepare for screening
- give samples at the required times
- get your results
- manage any absences you need to take
- apply to decrease your screening.

## 2. Compliance context

You must comply with this procedure and:

- our *Drug screening policy*
- any drug screening conditions on your registration.

If a condition on your registration is inconsistent with this procedure or the *Drug screening policy*, the condition prevails.

We will decide all aspects of screening, including how often you need to attend. Our monitoring team will monitor your compliance.

## 3. Key information

We use urine drug screening and hair drug screening to monitor NSW health professionals and students<sup>1</sup> where there is a history of or concerns about substance misuse or dependence. We do this to protect the public.

We understand that providing samples can be inconvenient, intrusive and expensive. However, negative drug screening results are an effective way for us to know you are not affected by substances and can continue safely in practice or training.

## 4. Responsibilities

Parties responsible (Positions/Groups/Bodies)	Key responsibilities
NSW registered health professionals and students <sup>1</sup>	comply with processes for drug screening outlined in this procedure.
HPCA monitoring team	monitor compliance with this procedure on behalf of the Council.
Councils	make decisions about a participant's progress and compliance with the <i>Drug screening policy</i> and this procedure.

<sup>1</sup> does not apply to Psychology

## 5. Definitions and abbreviations

Term	Explanation
AHPRA	Australian Health Practitioner Regulation Agency
Council / we / our	relevant Health Professional Council
HCCC	Health Care Complaints Commission
HPCA	Health Professional Councils Authority
participant / you / your	a registered health professional or student <sup>1</sup> participating in drug screening because a condition on their registration requires it
the Standard	AS/NZS 4308:2008, <i>Procedures for specimen collection and the detection and quantitation of drugs of abuse in urine</i>
substance	any: <ul style="list-style-type: none"> <li>substance listed in Schedule 1 of the <i>Drug Misuse and Trafficking Act 1985</i></li> <li>pharmacist only, prescription only or controlled drug medication as contained in Schedule 3, 4 or 8 of the <u>Poisons Standard (SUSMP)</u>.</li> </ul>

<sup>1</sup> does not apply to Psychology

## 6. Preparing for screening

### 6.1 Timing

#### Start date

If you must attend urine drug screening, you need to start within seven (7) days of the condition being placed on your registration.

If you must attend hair drug screening, we will tell you the start date.

#### Frequency

We will advise how often you must attend drug screening both when the condition is placed on your registration and if your conditions change.

The table below outlines the requirements for each type and frequency of screening.

Screening type	Frequency	Requirements
Urine drug screening	Three (3) times a week	You must attend for screening every Monday, Wednesday and Friday.
	Random	You must call <b>1800 654 068</b> each weekday between midnight and 5 pm to find out whether you must attend for screening that day. You will be screened at least 15 times every six (6) months on randomly selected dates.

Hair drug screening	Once a quarter	We will inform you when you must attend for screening.
	Random	

**Public holidays**

If you must attend three (3) times a week urine drug screening you do not need to attend for screening on public holidays (as defined in the *Public Holidays Act 2010 (NSW)*). But you must attend the next business day after the holiday.

If you must attend random urine drug screening you do not need to call the Council random screening phone number on a public holiday.

**Extra screening**

We may require you to attend for extra screening if we:

- are concerned you are not complying with this procedure, the related policy or any drug screening conditions on your registration
- believe you may have used a substance.

We will advise when you need to attend for extra screening. You may need to attend on a weekend.

**6.2 What to avoid**

**Substances**

We have all urine and hair samples screened for the substances listed in Appendix A.

**Prescribed substances and over-the-counter preparations**

Some prescription medicines and over-the-counter preparations may cause positive screening results. It is your responsibility to avoid these while you are attending for screening.

Do not self-administer any of the following unless advised or prescribed, and taken at the direction of a treating practitioner:

- prescribed substances
- narcotic derivatives
- non-prescription compound analgesics
- cold and flu medicines.

If you need to take any of these substances due to an illness, procedure or emergency, you must:

- notify us within five (5) business days, or as soon as practicable in an emergency
- send us written confirmation from the treating practitioner of the event and any substances advised, prescribed or administered.

You must vigilantly check any over-the-counter preparations you take, including supplements and

---

complementary medicines. You must review the ingredient list for any substance that may cause a positive result. If the exact ingredients are not listed or you are unsure, you must avoid the preparation.

---

**Some food and drink**

Ingredients in foods and drinks can cause positive results. Before you eat or drink anything, carefully check that it does not include ingredients that may cause a positive result. If you cannot find out its exact ingredients, you must avoid it.

Do not eat food that contains poppy seeds. You cannot use poppy seed consumption to explain a positive screening result.

Do not drink too much water before you attend for urine drug screening, as this can dilute your sample and cause an unsatisfactory result.

## 7. Giving samples

### 7.1 Collection centres

---

**Council-approved collection centres**

You must attend a [Council-approved collection centre](#) for screening.

Contact your nominated collection centre to confirm their opening hours and the time you need to attend.

---

**Alternative arrangements**

We must approve any alternative arrangements, and will only do so in exceptional circumstances.

If you cannot attend a Council-approved collection centre, you must:

- write to us explaining why
- propose an alternative collection arrangement
- ensure that we receive this proposal as soon as possible, noting that for urine drug screening you must start screening within seven (7) days of the condition being placed on your registration.

These arrangements must meet all our collection and screening requirements, and can include collection by a local registered medical practitioner, nurse or pathology provider. You are responsible for any additional costs that may be incurred.

## 7.2 Sample collection and handling

---

**Urine** If you are giving a urine sample it must be collected under direct supervision. The collector will stand in front of you and directly observe the urine passing from the urethra into the container.

Samples are otherwise collected and handled in line with the Standard.

---

**Hair** If you are giving a hair sample, your hair must be:

- at least 3 cm long
- free from hair products.

The collector will cut a pencil-width section of hair from as close to your scalp as possible.

---

**All samples** You must not handle your specimen at any time during the collection.

## 7.3 Forms

---

**Drug screening request form** We will provide you with *Drug screening request* forms. You must complete the participant section of this form at every collection.

You must complete this form correctly or the pathology provider may not screen your sample.

On the form, you must write down:

- any substances (prescribed or otherwise) you consumed since your last sample collection
- which parties need your results, including us, your treating practitioner and your Council-appointed practitioner
- whether you want your results sent to you and any relevant group e.g. professional indemnity insurer.

---

**Chain of custody** Every sample must have an accompanying chain of custody form, completed in line with the Standard.

For a urine sample, this must state:

- how the sample collection was supervised
- the sample temperature, recorded within 4 minutes of collection
- the urine creatinine result.

For a hair sample, this must state whether your hair is:

- chemically treated (permed, dyed or bleached)
- free from hair products.

---

You must ensure the collector completes this form, and you must sign it when the sample is collected.

We recommend you also keep your own sample collection records and ask the collector to sign them each time.

## 7.4 Costs, identification and privacy

---

**Payment** You are responsible for all collection and screening costs, including any confirmatory testing. You must pay the collection centre when you attend for screening. If you cannot pay when you attend, the centre cannot collect a sample. We will consider this a missed screen.

Screening is not eligible for a Medicare rebate.

---

**Proof of identity** You must show government-issued photo identification, such as a valid driver licence, identity card or passport, to the collector each time you give a sample.

---

**Pseudonyms** If we approve, you can use a pseudonym for screening. You must write to us and provide your:

- proposed pseudonym
- real name and photo identification
- consent to provide the pseudonym to all treating practitioners and Council-appointed practitioners who may receive your screening results.

The collector must verify your real identity each time you give a sample.

## 8. Getting your results

### 8.1 Recipients

---

**Nominated parties** The pathology provider will send your results to the parties nominated on your *Drug screening request* form.

You can also request a copy for:

- yourself
- any relevant group e.g. professional indemnity insurer.

### 8.2 Positive or unsatisfactory results

---

**Positive urine drug screening result** A urine drug screening result is positive if both of the following apply:

---

- it shows your sample contains a substance listed in [Appendix A](#)
- a treating practitioner has not confirmed they advised, prescribed or administered that substance.

In some cases your sample may be tested again to confirm the result. You are responsible for the cost of any confirmatory testing.

**Positive hair drug screening result**

A hair drug screening result is positive if both of the following apply:

- it shows your sample contains a substance listed in [Appendix A](#)
- a treating practitioner has not confirmed they advised, prescribed or administered that substance.

**Dilute urine samples**

A dilute urine sample has a creatinine level below 1.76 mmol/L.

If your urine drug screening result shows you provided a dilute sample, we will notify you and ask you to take the necessary steps to avoid further dilute samples.

**Unsatisfactory results**

The following table lists unsatisfactory results for each type of screening.

Screening type	Unsatisfactory result
Urine drug screening	<ul style="list-style-type: none"> <li>• you provide more than one dilute urine sample</li> <li>• your urine sample was adulterated or substituted</li> <li>• your urine sample was otherwise inadequate or unsuitable.</li> </ul>
Hair drug screening	<ul style="list-style-type: none"> <li>• your hair sample was inadequate or unsuitable.</li> </ul>

If you receive an unsatisfactory result, we will:

- ask you for a written explanation
- use your explanation and information from the pathology provider to decide whether to take further action.

## 9. Managing absences and operational issues

### 9.1 Absences from screening

**All absences**

You must follow these procedures when taking leave from practice. If you take leave, we may also:

- require your employer or accreditor to confirm your leave period

- verify your absence from practice with Medicare.

You must continue to screen during absences from practice, except in the circumstances specified below.

If you are absent and do not follow these procedures we may take further action, particularly if your absences follow a pattern.

## Planned absences

If you intend to take a planned absence from practice, you must:

- complete our [Leave from screening](#) form
- ensure we receive this at least five (5) business days before your planned absence.

If you are undergoing urine drug screening, you must meet the following requirements:

Reason	Requirements
Travel within Australia	<p>You must continue to attend for screening while you travel and attend the Council-approved collection centre you nominated on your <a href="#">Leave from screening</a> form.</p> <p>If you are travelling to a remote location with no available approved centre, we may approve leave from screening. When you return, you must:</p> <ul style="list-style-type: none"> <li>• attend for screening no later than the next business day</li> <li>• send us evidence of your travel, such as boarding passes and receipts, within five (5) business days.</li> </ul>
Travel outside Australia	<p>You do not need to attend for screening while you are outside Australia.</p> <p>When you return from leave, you must:</p> <ul style="list-style-type: none"> <li>• attend for screening no later than the next business day</li> <li>• send us evidence of your travel, such as boarding passes and receipts, within five (5) business days.</li> </ul>
Planned health procedure	<p>You must inform us of any planned health procedure that may stop you from attending for screening.</p> <p>When you return from leave, you must:</p> <ul style="list-style-type: none"> <li>• attend for screening no later than the next business day</li> <li>• send us written confirmation of the procedure from the practitioner who performed it and any substance they administered, prescribed or advised, within five (5) business days.</li> </ul>
Any other planned leave	<p>We will consider requests for planned leave for other reasons individually. You need to provide evidence to support your leave request for us to consider.</p>

If you are undergoing hair drug screening and plan to be absent on the date you must attend for screening by, you must attend before you leave. We will use the date you attend to recalculate your next screening date.

### Unplanned absences

If you have an unplanned absence from urine or hair drug screening, you must meet the following requirements:

Reason	Requirements
Missed screen	<p>If you realise you have missed your screening, you must:</p> <ul style="list-style-type: none"> <li>• notify us immediately</li> <li>• provide us with evidence to support your absence within five (5) business days</li> <li>• attend for screening no later than the next business day.</li> </ul>
Illness	<p>If you are ill and cannot attend for screening, you must:</p> <ul style="list-style-type: none"> <li>• notify us within 24 hours of failing to attend</li> <li>• visit a medical practitioner who knows you are required to attend for screening and ask them to complete an <a href="#">Illness certificate</a> form.</li> </ul> <p>When you return from leave, you must:</p> <ul style="list-style-type: none"> <li>• attend for screening no later than the next business day</li> <li>• ensure we receive your <a href="#">Illness certificate</a> form within five (5) business days.</li> </ul> <p>The certifying medical practitioner can only certify that you are ill for a maximum of three (3) business days. If you are ill for more than three (3) days you need to notify us and send us another completed <a href="#">Illness certificate</a> form. We prefer the same medical practitioner completes the form each time.</p> <p>If you remain ill after that and are unable to screen you must contact us and provide supporting information from your treating practitioner about your illness, whether any substance has been advised, prescribed or administered, and when you will be able to return to screening. You must not practise during this time.</p>

## 9.2 Operational issues

### Random screening phone number issues

If the random screening phone number is not working when you call, you must:

- note the time you called
- tell us immediately.

We will tell you whether you need to attend for screening that day.

The next day, call the random screening phone number as usual. If we don't expect the issue to be fixed by the next day, we will tell you what to do.

**Pathology provider issues**

If the Council-approved collection centre cannot collect your sample, you must:

- tell us immediately
- attend for screening no later than the next business day
- send us the pathology provider's written explanation for why they could not collect the sample, within five (5) business days.

## 10. Ending your screening

### 10.1 Decreases

**Decreasing your screening**

We will decide when you need less frequent screening or a different type of screening.

**Requirements**

We will only consider decreasing your screening if you meet the requirements below. Unless there is a material change to your circumstances, you must meet the minimum time periods.

Screening type	Requirements
Urine drug screening (3 times a week)	<p>You may be eligible to decrease to random urine drug screening if you:</p> <ul style="list-style-type: none"> <li>• can show you have fully complied with your conditions, this procedure and the related policy</li> <li>• received negative or nil-detected results for 18 months.</li> </ul>
Urine drug screening (random)	<p>You may be eligible to decrease to hair drug screening only or to stop your screening if you:</p> <ul style="list-style-type: none"> <li>• can show you have fully complied with your conditions, this procedure and the related policy</li> <li>• received negative or nil-detected results for a further 12 months.</li> </ul>
Hair drug screening	<p>You may be eligible to decrease from once a quarter hair drug screening to random or to stop your screening if you:</p> <ul style="list-style-type: none"> <li>• can show you have fully complied with your conditions, this procedure and the related policy</li> <li>• received negative or nil-detected results</li> </ul>

---

**Reviews** You can request a review of your screening requirements by writing to us and providing evidence to support this request.

---

**Considerations** We will decide whether to decrease your screening based on factors such as:

- your request and the evidence you provide
- your drug screening results and other information from the pathology provider
- reports from your Council-appointed practitioner, treating practitioner and any interview or hearing with us
- your compliance with the conditions on your registration
- your engagement with treatment
- your health
- any other information about your progress.
